お酒の代わりに | Koji Clear

Sake is made with rice malt, rice, water and sake yeast.

Amazake is made only with rice malt, rice and water.

Amazake does not use sake yeast and does not produce alcohol.

Amazake is so healthy that it is said to be
"drinking intravenous drip."

Koji Clear is brewed using an evolved Amazake method
and filtered for a clear finish.

Koji Clear is brewed by a sake brewery in Akita Prefecture.

Like sake, Koji Clear goes well with Japanese cuisine.

Highly recommended for food and drink pairing.
